

INTEGRATION PARTNER

AVPMi

One Connected Parking & Valet Guest Experience

3 Key Benefits

○ SEAMLESS PARKING & VALET EXPERIENCE

Create a more connected journey between self-parking and valet operations within TIBA-powered locations. AVPMi extends the parking experience with valet solutions designed to complement the site's existing parking infrastructure while providing guests with convenient, professional service.

○ STREAMLINED VALET OPERATIONS

Bring greater consistency and control to valet operations through technology-enabled workflows. From vehicle intake and retrieval to transaction management and operational oversight, AVPMi simplifies daily valet activities while improving service efficiency and accountability.

○ ENHANCED GUEST & PROPERTY EXPERIENCE

Valet is often the first and last interaction a guest has with a property. Combining TIBA's parking technology ecosystem with AVPMi's valet expertise helps properties deliver a convenient, efficient, and professional parking experience while supporting the operational needs of owners and operators.

3 Ideal Use Cases/Environments

HOTELS & HOSPITALITY

AVPMi's enterprise PMS integration capabilities connect valet operations with hotel systems, helping streamline guest recognition, parking charges, validations, and operational workflows across single properties and multi-property portfolios.

MIXED-USE, RETAIL & COMMERCIAL PROPERTIES

Enhance convenience and manage peak demand with integrated valet solutions designed for diverse visitors, tenants, and customers.

HEALTHCARE & HIGH-TRAFFIC DESTINATIONS

Simplify arrival and departure where convenience, accessibility, and efficient vehicle movement are especially important. AVPMi valet solutions help support simple or complex locations while giving guests a more convenient alternative to traditional self-parking.

3 Integration Highlights

BUILT TO COMPLEMENT THE TIBA ECOSYSTEM

AVPMi valet solutions are designed to operate alongside TIBA-powered parking environments, extending the capabilities available to locations that require both self-parking and valet services.

CONNECTED VALET TRANSACTIONS & WORKFLOWS

Create a smoother operational connection between valet activities and the property's parking environment, helping simplify vehicle handling, transactions, and day-to-day management.

GREATER OPERATIONAL VISIBILITY

Give parking teams and property stakeholders better insight into valet activity and performance, supporting more informed operational decisions and a more consistent guest experience.

From parking to valet, one connected experience.
